OASISLAND CATALOGUE 2014/2015

Creative for **Sustainability**

Over the years, we have been constantly working with sustainability in mind to bring you not only new, creative range of products, but also our commitment to environmental sustainability which has shifted to the front line of everything we do. For the latest 2014/2015 collections, Oasisland presents OS products which blend art with ecology and sustainability.

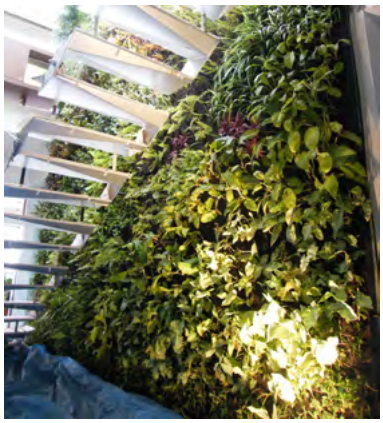
OS **VERTICO**

A SELF-SUSTAINED GREEN WALL

Green wall has gained more and more popularity recently with every development of public spaces striving to provide more vertical green walls to green the environment and to create quality visual treats.

However not every green wall is a success story due to a higher level of difficulty in maintenance and irrigation that may cost more than expected. Therefore, **Oasisland OS VERTICO** is designed with **self-watering system** with **smart water solutions.**



OS **VERTICO** System

Components

Each Tray can hold up to 12-18 potted shrubs.
4 Sets /1 square meter

- 3 Pieces Planter Tray
- 1 Rear Box Holder
- 6 Pieces Water-Proofing Panel
- 6 Pieces of Cotton Tape

Planter Tray

Planter Tray Insertion
into Rear Box Holder

Planter Tray Placement
into Rear Box Holder

Water Pipe Outlet

OS **VERTICO**

SMART WATER

Our system allows water to flow from the top of the planter into the water tank and then to storage area with excess water flowing to the next layer of planters.

Plus, each body of the basin is connected so that water level between basins can be adjusted and fully utilised to save water. The added advantage is that any liquid fertilizer can also be applied using this system.

In the situation that the water content is high, it will flow into the water-proof panel to avoid plants decay. On the opposite, if the soil moisture decreases the cotton will absorb water from the storage located at the bottom to continuously irrigate the plants.

Features & Advantages

- Rear Box Holder secures the whole planters on the wall and keep the wall dry at all time
- It acts like a drawer, pull out the planter tray for plant changing
- 23cm planter depth is ideal for root growing
- Pipe can be fixed at the water outlet at the rear of the planter to drain accesssive water
- Ideal for indoor and outdoor

OS **ARTECO**

ART + ECO

Combining Art & Eco Friendly creativity, we present to you OS ARTECO.

A sculptured modular planter that flourishes with individual creativity. Inspired from trees growing on the cliff surfaces, this unique modular planter is the answer to your needs in creating a vertical garden that fits in every single inch of the designated space.

OS **MAGIKA**

A ILLUMINATED PLANTER

Illuminate your night with the new planter pot that glows in the dark.

The OS MAGIKA is a new line of designer plastic planters. They are produced in special, non-toxic polyethylene plastic; whose characteristics guarantee resistance to inclement weather (-45°, +60°), breakages and ultraviolet rays. There are two styles of planters, illuminated and colorful planters, available in black, dark grey, terracotta, green, red, etc. They are extremely decorative for both indoor and outdoor environments.

Features & Advantages

- **Anti-Shock**

Manufactured with an extremely resistant PE plastic, our crack proof planters provide years of enjoyment.

- **Weather Proof**

Our planters do not crack in winter or fade in summer/ tropical, as they are protected against harsh weather and ultraviolet rays.

- **Lightweight**

All planters are easy to handle and convenient to install.

- **100% Recyclable**

All planters are made of LLDPE plastic and can be recycled.

- **Indoor & Outdoor use**

Decorating for both indoor and outdoor environments.

OS **LECHUZA**

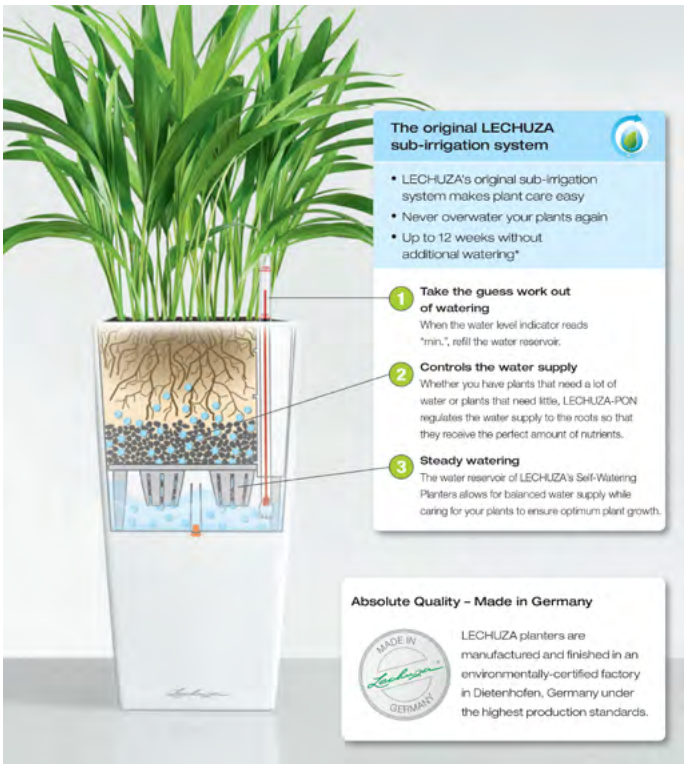
SELF-WATERING PLANTERS

Simplicity and quality is our philosophy when it comes to materials, which is why we work with Lechuza planters.

We listened to our clients and so we wanted to make plant care as simple as possible. This proven, sub-irrigation system ensures that your plants always receive the right amount of water needed for continuous, healthy growth.

Benefits

- Better plant growth thanks to a balanced supply of water to the roots
- Less water
- Changing plants is easy
- Mobile and moveable
- Quality assured, from Germany



The original LECHUZA sub-irrigation system
• LECHUZA's original sub-irrigation system makes plant care easy
• Never overwater your plants again
• Up to 12 weeks without additional watering*
1 Take the guess work out of watering
When the water level indicator reads "min.", refill the water reservoir.
2 Controls the water supply
Whether you have plants that need a lot of water or plants that need little, LECHUZA-PON regulates the water supply to the roots so that they receive the perfect amount of nutrients.
3 Steady watering
The water reservoir of LECHUZA's Self-Watering Planters allows for balanced water supply while caring for your plants to ensure optimum plant growth.
Absolute Quality – Made in Germany
MADE IN GERMANY
LECHUZA planters are manufactured and finished in an environmentally-certified factory in Dietenhofen, Germany under the highest production standards.

Patented: The LECHUZA plant liner
The stable LECHUZA plant liner facilitates changing the planting, as well as the transport of your plants.
Form with function: DIAMANTE, RONDO, and DELTA (and in Spring 2013, even CLASSICO LS and QUADRO LS) come equipped with not only plant liners but also recessed frame handles that match the planter's color.

OS **ECODEC**

A SUSTAINABLE COMPOSITE WOOD

According to survey from the World Wood Organisation, 30 hectares of forest are disappearing in every one minute and this means our environment is degrading due to excessive cutting of wood for construction and industry use.

In order to meet the needs without sacrificing more tree cuttings, OS ECODEC utilises recycled bamboo, wood and plastic composite from the industry waste to develop new environmental friendly product. This process deploys modern biological technology with special additive which contain no formaldehyde, radiation and pollution. After use, OS ECODEC can be recycled and reused in a sustainable manner.

Product Range

The product can be applied to various usages and design forms such as:

- Outdoor Deck
- Outdoor Wall Panel
- DIY Deck Tiles
- Pavilion and Water Platform
- Fence & Railing
- Outdoor Furniture

OS **PALMERA**

A PRESERVED PALM & PLANTER

Be it a theme park, hotel, commercial space or even an airport, preserved tropical palm trees can help you create a lush tropical oasis instantly without the trouble to plant or maintain.

OS PALMERA is our new range of preserved palms with designer planters to give a fresh touch to the indoor environment. Our tailored design combines artistic sculptured planters with lightings and seating to suit each of the interior design concepts.

OS **GLAD**

DRESS ME IN GREEN

Green Living Walls are becoming a feature of our buildings' interior and exterior, regardless of whether it is a tall building or an intimate restaurant. However, living green walls often have a high maintenance cost and plants struggle to survive after a period of time due to lack of natural light or poor irrigation.

Yet vertical planting doesn't have to be real to be effective. OS GLAD or Green Wall Cladding is the solution to add value to architectural features or garden designs. It can provide the visual benefits of a living green wall, with added advantages in terms of space, maintenance, year round interest and cost, all via an innovative way to use artificial plants to create an outstanding vertical green wall.

Benefits

- Easy and quick to install
- Resistant to rain and heat
- UV Resistant for outdoor use
- No watering required
- Easy to clean with water
- Immediate results
- Maintenance free
- Durable
- Easily installed with any support

OS **GRASS**

INSTANT GREEN & FRESHNESS

Artificial grass is ideal for outdoor, all year round living, yet it can be harmed by sunlight and UV rays which cause colours to fade and reduces the lifespan of the product.

Like our skin, outdoor products should be protected, and that is why our artificial grass is created to be UV ray-resistant, which provides long lasting, fresh, green spaces, anywhere you want.
